2 RELEASE COMPONENTS

This CarTool release consists of the following release components.

2.1 [eu.europa.ec.eira.cartool 4.1.0.v20210729-1410.jar](#)

The CarTool Archi® plug-in.

Modification	Details
Version 4.1.0	
EIRA v4.1.0 Support	Align the CarTool plugin with the latest available version of the EIRA (v4.0.0)
Restructure of the CarTool folders -Create the "My Solution Architecture Templates" folder	Creation of a new folder in the CarTool under the folder "EIRA Extension Library". The new folder has been called "European Library of Architecture Principles". The folder includes the new ELAP library.
ELIS v1.1.0 Support	Align the CarTool plugin with the latest available version of the ELIS (v1.1.0)
eGovERA Model inclusion	Include inside the CarTool also eGovERA Business Agnostic, eGovERA Tax and eGovERA Health Reference Architectures
Version 4.0.0	
CarTool release based upon Archi(r) v4.7.1 with support for EIRAv4.0.0	Align the CarTool plugin with the latest available version of the Archi software. The latest version is Archi 4.7.0, released on 15 July 2020. This version of Archi supports ArchiMate 3.1.
EIRA v4.0.0 Support	Align the CarTool plugin with the latest available version of the EIRA (v4.0.0)
Restructure of the CarTool folders -Create the "My Solution Architecture Templates" folder	Creation of a new folder in the CarTool under the folder "My Library". The new folder has been called "My Solution Architecture Templates". The folder has two sub-folders called "My Detailed-Level Solution Architecture Templates" and "My High-Level Solution Architecture Templates". These folders enable the user to collect all his/her solution architecture templates.
Import of Solution National Architecture Templates (both HL and DL SATs)	Development of a functionality to import national High-Level and Detailed-Level Solution Architecture Templates. This functionality requires adding the possibility to import the proper Archimate file in "My Detailed-Level Solution Architecture Templates" or "My High-Level Solution Architecture Templates" folder depending on the type of SAT. Inserted the instructions to import and use National Interoperability Specifications and Reference Architecture Updated the instructions to consult the ELIS (European Library of Interoperability Specifications)
Qualification of the imported RAs and DL/HL SATs	It has to be implemented in the CarTool the functionality to qualify the imported RAs and DL/HL SATs. Furthermore, it has to be defined a clear nomenclature.
Enable the functionality "Add to model" for the Interoperability Requirement ABB when creating a HL SAT	Development of a functionality enabling the user to instantiate the Interoperability Requirement ABB in a new HL SAT as a Solution Building Block (SBB). This features was present only when the user is modelling a new solution or DL SAT. This functionality has been enabled only for the Interoperability Requirement ABB present in the EIRA Ontology Viewpoint when the user is modelling a HL SAT.
Version 3.1.0
