1 Introduction

1.1 Purpose of this document

This document contains the description of the release version 6.0.0 of the EIRA.

EIRA is an architecture content metamodel defining the most salient architectural building blocks (ABBs) needed to build interoperable e-Government systems (Decoupled functionalities).

1.2 Release date

This version of the EIRA has been released on the 31th of May 2023 in [Joinup](#).

1.3 Description

EIRA v5.0.0 was released on the 11th of May 2022 after which a quality review of EIRA has been done. About oneyear later, a MAJOR version 6.0.0 of the EIRA has been released, containing upgrades related to the views, viewpoints, ABBs and documentation. The content of the releasehas been developed through an agile project management approach. Tickets from EC internal and external stakeholders have been analysed in order to address their feedback and requirements.

1.4 List of acronyms used in this document

ABB	Architectural Building Block
EC	European Commission
EIRA	European Interoperability Reference Architecture.
IoP	Interoperability
SKOS	Simple Knowledge Organization System

2 Release Components

The EIRA consists of the following release components.

2.1 [EIRA v6.0.0 ArchiMate.xml](#)

The Open Group ArchiMate Exchange File Format, containing the model.

Modification	Details
Version 6.0.0	
ABBs, Views and Viewpoints update	<p>The quality review carried out has been focused on enhancing the consistency of all views and between them. Properties have been harmonized amongst the whole model. LOST views have been reviewed and modified to make them broader and detailed, putting an additional effort to the Technical view - Infrastructure. Also, a focus on Data Spaces has been considered to ensure that technical aspects for the implementation of data spaces are covered within EIRA. The different viewpoints have been refined according to the new approaches presented in the views. Specifically, an "Enterprise Architecture Framework alignment guidelines" viewpoint has been added to ensure and help users to align an Enterprise Architecture Framework to EIRA.</p>  <p>EIRA v6.0.0 Changes.xlsx</p>
Version 5.0.0	
ABBs, Views, and Viewpoints update	All the ABBs definitions have been reviewed, new ABBs have been created and obsolete ABBs have been deprecated based on the feedback received by EC internal and external stakeholders through an agile project management approach. Furthermore, views and viewpoints have been revised
Enhancement of the EIRA Security viewpoint	Specific ABBs dealing with Security have been introduced
Version 4.1.0	
ABBs update	All the ABBs definitions have been reviewed, new ABBs have been created and obsolete ABBs have been deprecated based on the feedback received by EC internal and external stakeholders through an agile project management approach.

EIRA version 6.0.0 release notes

Alignment of the Archi Model with the Business Agnostic Reference Architecture	The EIRA has been updated with the inclusion of new ABBs to enable the support of end-to-end design of digital public services taking into account the concepts defined in the eGovERA Business Agnostic Reference Architecture.
Version 4.0.0	
ABBs update	All the ABBs definitions have been reviewed, new ABBs have been created and obsolete ABBs have been deprecated based on the feedback received by EC internal and external stakeholders through an agile project management approach.
Alignment of the Archi Model with the Business Agnostic Reference Architecture	The EIRA has been updated with the inclusion of new ABBs to enable the support of end-to-end design of digital public services taking into account the concepts defined in the eGovERA Business Agnostic Reference Architecture.
Introduction of the Architecture Principle viewpoint	The EIF Underlying Principle viewpoint has been substitute by the Architecture Principle viewpoint which enriches and enlarges the scope of the interoperability principles.
Introduction of the EIRA Ontology Viewpoint	The Metamodel viewpoint has been aligned with the new EIRA Ontology introducing the Ontology viewpoint
Version 3.1.0	
ABBs definition update	All the ABBs definitions have been reviewed, new ABBs have been created and obsolete ABBs have been deprecated based on the feedback received by EC internal and external stakeholders through an agile project management approach.
Archimate notation (v3.1.0)	Update of the EIRA to the new version of the Archimate notation (v3.1.0)
Introduction of the multidimensional nature of interoperability	Introduction of the multidimensional nature of interoperability involving structural interoperability, behavioural interoperability and governance Interoperability. Each ABB has been mapped with one or more interoperability dimension.

EIRA version 6.0.0 release notes

Update of the key interoperability viewpoint	Update of the key interoperability viewpoint introducing four key concepts "Shared Legal Framework", "Shared Governance Framework", "Shared Knowledge Base" and "Shared Platform", which enable the achievement of structural, behavioural and governance interoperability.
Version 3.0.0	
ABBs definition update	All the ABBs definitions have been reviewed in relation to the feedback provided by EC internal and external stakeholders through an agile project management approach. A section referring the interoperability saliency has been introduced in order to state the ABBs interoperability relevance for EU integrated public services. EIF is the fundamental framework on which has been developed ABBs interoperability saliency.
EIRA viewpoints update	EIRA viewpoints have been updated in relation to the feedback provided by EC internal and external stakeholders through an agile project management approach.
Introduction of new viewpoints: EIRA Metamodel viewpoint and Interoperability Privacy viewpoint	New viewpoints have been added to match the "EIRA Metamodel viewpoint" as it is provided in the New European Interoperability Framework and to match the "Interoperability GDPR viewpoint" as it is stated in the "EU General Data Protection Regulation (GDPR)".
Examples	ABB examples have been reviewed. Obsolete examples have been replaced with up-to-date ones.
Version 2.1.0	
ABBs definitions Update	All the ABBs definitions have been reviewed and now include a synonym to the ABB name and an example of an existing Solution Building Block specializing this ABB.
Introduction of a new viewpoint: Conceptual Model for Integrated Service Provisioning	A new viewpoint has been added to match the "Conceptual Model for Integrated Service Provisioning" as it is provided in the New European Interoperability Framework.

EIRA version 6.0.0 release notes

Examples	Architecture Building Blocks have received examples to guide the user in the type of implementation that can be imagined for these building blocks.
Version 2.0.0	
ArchiMate® 3 upgrade	EIRA© v1.2.2 was aligned with ArchiMate® 2.1, EIRA© v2.0.0 is aligned with ArchiMate® 3.0
Alignment with the new version of the EIF (the New European Interoperability Framework)	<p>Introduction of new viewpoints to align with the cross-cutting concerns that are introduced in the new version of the "European Interoperability Framework(EIF):</p> <ul style="list-style-type: none"> • "Interoperability Governance viewpoint" • "Integrated Public Service Governance" • "Security and privacy viewpoint" <p>Introduction of a new view:</p> <ul style="list-style-type: none"> • "EIF Underlying Principles" <p>Introduction of new Architecture Building Blocks (ABBs), specialising "Organisational Interoperability Enablers" on the "Organisational View":</p> <ul style="list-style-type: none"> • "Security Policy" • "Security Framework" (as specialisation of "Security Policy") <p>Introduction of new Architecture Building Blocks (ABBs), specialising "Data" on the "Semantic View":</p> <ul style="list-style-type: none"> • Open Data Base Registry (as specialisation of "MasterData")

EIRA version 6.0.0 release notes

Better use of in Interoperability Specifications	<ul style="list-style-type: none"> • Each view has a grouping to which Interoperability Specifications have been attached, indicating that any Architecture Building Block can be associated with any Interoperability Specification. • The "Data standards" ABB on the "Semantics view" has been removed as parent ABB, the implementing ABBs have been recognised as ABBs specialising the Semantic Interoperability Specifications ABB. • The "Interoperability Specification Underpinning view" has become a viewpoint with some adaptations to support these changes. • The "Technical Interoperability Specification" is no longer attached to the "Service Registry Component" in the "Technical view – infrastructure", but associated to the entire "Digital Service Infrastructure", via its more generic parent class "Interoperability Specification".
Simplification of the Legal View	Simplification of the "Public Policy Cycle", the internals have been removed in order remove the process restrictions that were implicitly present. The "Public Policy Development Enabler" has been removed.
Descriptions of all the ABBs have been revised	References have been verified and updated where possible.
Minor changes	<ul style="list-style-type: none"> • Change of the ArchiMate® icon of representation. • The High-level overview has become a viewpoint. • The "Hosting and Networking Infrastructure" has been implemented as a grouping for the different attached services. • Introduction of a "Service Discovery Component" on the "Technical view – application".
Version 1.1.0	
Added IoP spec attributes	The Interoperable European Solution building block now includes attributes to record the interoperability assessment results.

EIRA version 6.0.0 release notes

Added GovIS 2 ID attribute	The Interoperable European Solution building block now includes the GovIS2 ID as an attribute for EC solutions. Govis2 is an internal EC portfolio management solution.
Changed relation between Public Policy Formulation and Implementation Instrument	The relation is now: "is realised by"
Completed documentation of "assign" relations	
Added TES attributes	All building blocks are updated to define the attributes used by the data collection and analysis activities of the ISA TES Action (2.14).
Additional relationship in the semantic view	[Data policy] influences [Data]
All services in the technical view are now considered application services	
All components in the technical view are now considered DSI components	

2.2 [EIRA v6.0.0 ArchiMate.archimate](#)

The 'Archi' version of the model.

Modification	Details
Version 6.0.0	
ABBs, Views and Viewpoints update	<p>The quality review carried out has been focused on enhancing the consistency of all views and between them. Properties have been harmonized amongst the whole model. LOST views have been reviewed and modified to make them broader and detailed, putting an additional effort to the Technical view - Infrastructure. Also, a focus on Data Spaces has been considered to ensure that technical aspects for the implementation of data spaces are covered within EIRA. The different viewpoints have been refined according to the new approaches presented in the views. Specifically, an "Enterprise Architecture Framework alignment guidelines" viewpoint has been added to ensure and help users to align an Enterprise Architecture Framework to EIRA.</p>  <p>EIRA v6.0.0 Changes.xlsx</p>
Version 5.0.0	
ABBs, Views, and Viewpoints update	All the ABBs definitions have been reviewed, new ABBs have been created and obsolete ABBs have been deprecated based on the feedback received by EC internal and external stakeholders through an agile project management approach. Furthermore, views and viewpoints have been revised
Enhancement of the EIRA Security viewpoint	Specific ABBs dealing with Security have been introduced
Version 4.1.0	
ABBs update	All the ABBs definitions have been reviewed, new ABBs have been created and obsolete ABBs have been deprecated based on the feedback received by EC internal and external stakeholders through an agile project management approach.

EIRA version 6.0.0 release notes

Alignment of the Archi Model with the Business Agnostic Reference Architecture	The EIRA has been updated with the inclusion of new ABBs to enable the support of end-to-end design of digital public services taking into account the concepts defined in the eGovERA Business Agnostic Reference Architecture.

Alignment with EIRA v3.1.0	
Version 3.0.0	
Alignment with EIRA v3.0.0	
Version 2.1.0	
Alignment with EIRA v2.1.0	
Version 2.0.0	
Alignment with EIRA v2.0.0	
Version 1.1.0	
Creation of the controlled vocabulary	
Version 1.0.0	

2.6 [ISA Product License v1.4.zip](#)

The license under which the EIRA is released.

Modification	Details
Version 1.4.0	
New version of the ISA license	
Version 1.3.0	
Replacement of specific ISA Product licenses by a generic license	
Version 1.2.0	
Typo "hereafter"	
"or later versions" replaced by "which replaces earlier versions"	
Version 1.1.0	
Typo "above" replaced by "below".	
Version or ArchiMate explicitly mentioned (i.e. 2.1).	
Reference to citizens of the EU included.	
Version 1.0.0	

2.7 [Joinup](#)

The public web-page (<https://joinup.ec.europa.eu/collection/european-interoperability-reference-architecture-eira/about>) containing information on the EIRA.

Modification	Details
Version 1.1.0	
Version 1.0.0	

2.8 [EIRA v6.0.0 release.zip](#)

An archive containing each of the above-mentioned files.
