Business Documents

AdditionalInformation_BD-009003_1

Information in answer to the Request For Additional Information. This Business Document should provide enough information to be able to execute the request for legal assistance

Property Term	n..m	Definition
Case	1..1	A legal action, especially one to be decided in a court of law, but not limited to be decided in a court of law
Identification	1..*	A unique identifier for a case
Number	1..1	An identifier assigned to a natural person or a legal person in some registry
Type	0..1	A classification
Refers To Identification	1..1	An identifier for a case as provided by the sender, in a response
Number	1..1	An identifier assigned to a natural person or a legal person in some registry
Type	0..1	A classification
Request	1..1	An act of politely or formally asking for something, based on a legal instrument within the context of a case.
Issuing Authority	1..1	.
Authority	1..1	.
Kind Of Authority	0..1	Codelist listing all kinds of authorities that can take decisions
Name	1..1	.
Code	0..1	The specification of the authority expressed as a value from a code list..
Address	0..1	.
Street	0..1	Street name
Street Number	0..1	Street number
PO Box	0..1	.
Postal Code	0..1	.
Address Line	0..*	additional unstructured address information or complete unstructured address
Description	0..1	.
Line Number	0..1	.
City	0..1	City
Name	0..1	.
Country	0..1	Country
Country Subdivision	0..1	A subdivision of a country
Contact Party	0..1	.
Contact Person	0..1	Natural person (individual)

Property Term	n..m	Definition
Family Name	1..1	A family name is usually shared by members of a family. This attribute also carries prefixes or suffixes which are part of the Family Name, e.g. "de Boer", "van de Putte", "von und zu Orlow". Multiple family names, such as are commonly found in Hispanic countries, are recorded in the single Family Name field so that, for example, Miguel de Cervantes Saavedra's Family Name would be recorded as "Cervantes Saavedra."
Given Name	0..1	A given name, or multiple given names, are the denominator(s) that identify an individual within a family. These are given to a person by his or her parents at birth or may be legally recognised as 'given names' through a formal process. All given names are ordered in one field so that, for example, the Given Name for Johan Sebastian Bach is 'Johan Sebastian.'
Communication	1..*	.
Channel	1..1	Type of communication channel (e.g. telephone, mobile phone, e-mail, fax, e-codex infrastructure) defined by code-list "Communication Channel"
Complete Number	0..1	A text string of characters that make up the complete number for this communication..
URI	0..1	The unique identifier of the Uniform Resource Identifier (URI) for this communication, such as a web or an email address.
Assisting Authority	1..1	.
Authority	1..1	.
Kind Of Authority	0..1	Codelist listing all kinds of authorities that can take decisions

Subject	1..1	Reference to the subject (cf subject field in an email.)
Subject Description	0..1	Short description of the subject of the request
Description	1..1	A detailed description of what it is that is requested.
Urgency Indicator	0..1	.
Involved Party	1..*	A person named as a party to an action or suit. For some purposes, a party who will really litigate the controversy, as distinguished from one defaulting in the action or consenting to judgment. In criminal law a party that does not represent the Law.
Person	0..1	Natural person (individual)
Family Name	1..1	A family name is usually shared by members of a family. This attribute also carries prefixes or suffixes which are part of the Family Name, e.g. "de Boer", "van de Putte", "von und zu Orlow". Multiple family names, such as are commonly found in Hispanic countries, are recorded in the single Family Name field so that, for example, Miguel de Cervantes Saavedra's Family Name would be recorded as "Cervantes Saavedra."
Second Family Name	0..1	A family name is usually shared by members of a family. This attribute also carries prefixes or suffixes which are part of the Family Name, e.g. "de Boer", "van de Putte", "von und zu Orlow". Multiple family names, such as are commonly found in Hispanic countries, are recorded in the single Family Name field so that, for example, Miguel de Cervantes Saavedra's Family Name would be recorded as "Cervantes Saavedra."

Property Term	n..m	Definition
Given Name	1..1	A given name, or multiple given names, are the denominator(s) that identify an individual within a family. These are given to a person by his or her parents at birth or may be legally recognised as 'given names' through a formal process. All given names are ordered in one field so that, for example, the Given Name for Johan Sebastian Bach is 'Johan Sebastian.'
Alternative Name	0..*	Any name by which an individual is known. Many individuals use a short form of their name, a 'middle' name as a 'first' name or a professional name. For example, the British politician and former UN High Representative for Bosnia and Herzegovina, Jeremy John Durham Ashdown, Baron Ashdown of Norton-sub-Hamdon, is usually referred to simply as 'Paddy Ashdown' or 'Lord Ashdown.' Note It is not the role of the alternative name field to record nick names, pet names or other 'familiar names' that will be of no consequence in public sector data exchange.
Gender	1..1	.
Birth Name	0..1	All data associated with an individual are subject to change. Names can change for a variety of reasons, either formally or informally, and new information may come to light that means that a correction or clarification can be made to an existing record. Birth names tend to be persistent however and for this reason they are recorded by some public sector information systems. There is no granularity for birth name - the full name should be recorded in a single field.
Date Of Birth	0..1	A date that specifies the birth date of a person
Place Of Birth	0..1	The official place of birth.
Geographic Name	0..1	A spatial reference in the form of a label that identifies a location
Geographic Name Code	0..1	A spatial reference in the form of a code that identifies a location
Country Of Birth	0..1	The official country of birth
Geographic Name	0..1	A spatial reference in the form of a label that identifies a location
Geographic Name Code	0..1	A spatial reference in the form of a code that identifies a location
Alias	0..*	An assumed identity
Family Name	0..1	A family name is usually shared by members of a family. This attribute also carries prefixes or suffixes which are part of the Family Name, e.g. "de Boer", "van de Putte", "von und zu Orlow". Multiple family names, such as are commonly found in Hispanic countries, are recorded in the single Family Name field so that, for example, Miguel de Cervantes Saavedra's Family Name would be recorded as "Cervantes Saavedra."

Property	Term	n..m	Definition
	Second Name	Family 0..1	.
	Given Name	0..1	A given name, or multiple given names, are the denominator(s) that identify an individual within a family. These are given to a person by his or her parents at birth or may be legally recognised as 'given names' through a formal process. All given names are ordered in one field so that, for example, the Given Name for Johan Sebastian Bach is 'Johan Sebastian.'
	Nationality	0..1	.
	Code	0..1	.
	Nationality	0..*	.
	Code	0..1	.
	Legal Person	0..1	A non natural person that has an involvement in an act, action, event or agreement
	Name	1..1	The name of a company or organisation
	Involvement	1..*	.
	Role	1..1	Role of the party involved in a court case (specified by code-list ""Role""). Note: The possible roles of a party depend on the type of court proceeding (case type). Typical roles of parties in civil cases are e.g. claimant, defendant, representative of claimant/defendant. Typical roles of parties in criminal cases are e.g. offender, victim, witness, representative of offender/victim. "
	Identification	0..*	An identification number for a person in a register.

Location

ISO 19112 defines a location as "an identifiable geographic place." With this in mind, "Eiffel Tower", "Madrid" and "California" are all locations and this is a common way of representing locations in public sector data, i.e. simply by using a recognised name. Such identifiers are common although they can be highly ambiguous as many places share the same or similar names. In addition to a simple (string) label or name for a Location, this vocabulary defines three further ways in which it can be identified: - by URI (such as a GeoNames or DBpedia URI); - by address; - by geometry, that is, a point, line or polygon expressed using coordinates in some coordinate reference system.
