

Modelling eGovernment Entities – Methodologies and Experiences Under Review

SEMIC.EU

Semantic Interoperability Centre Europe

Welcome

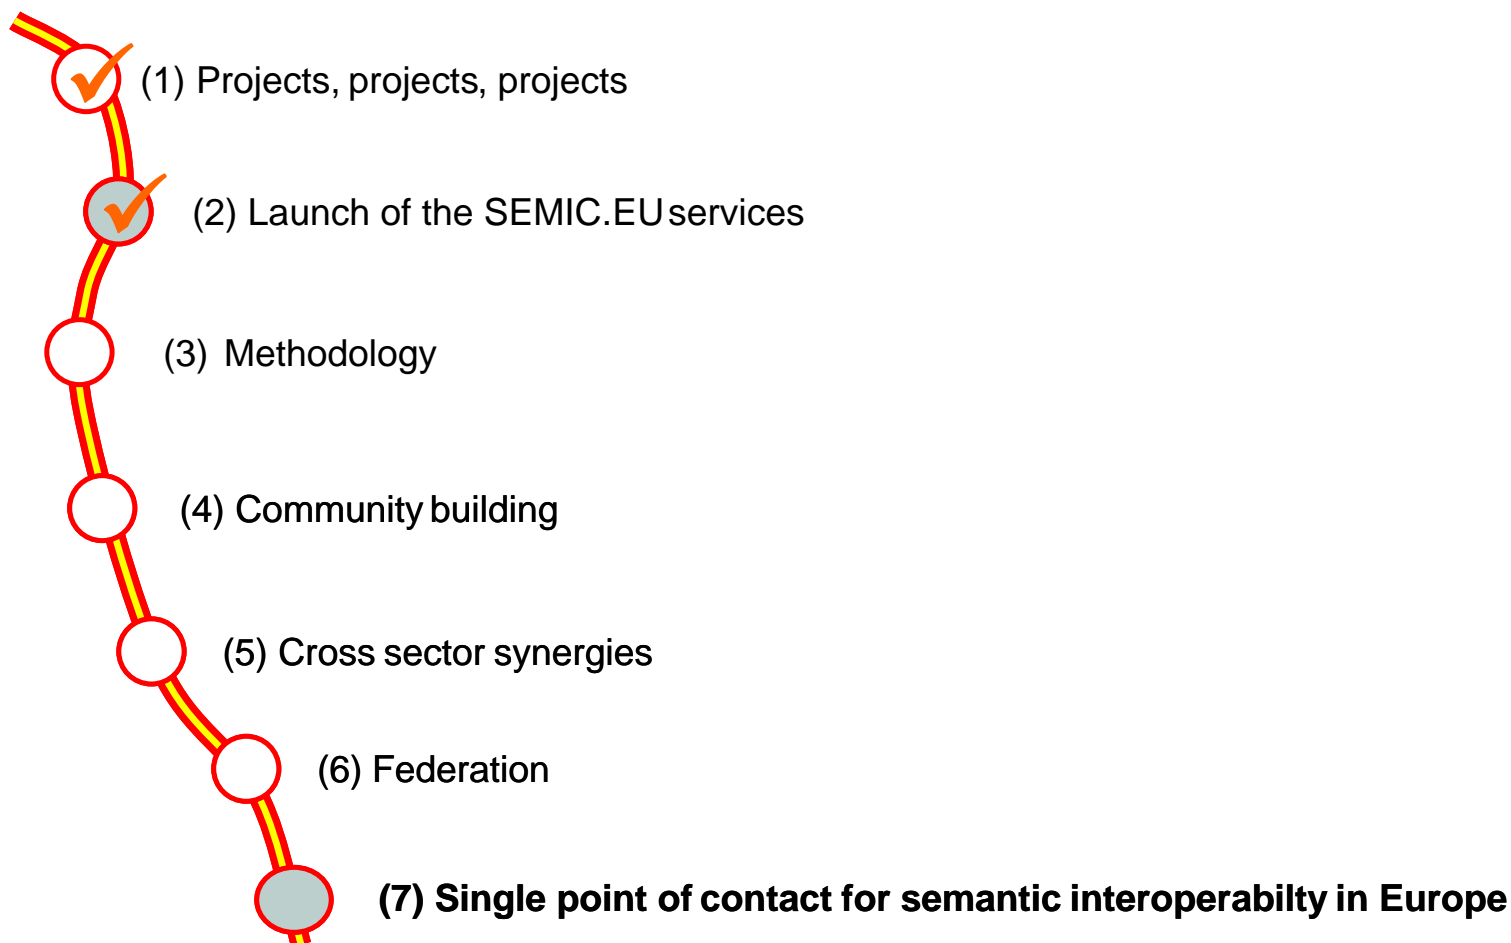

And Thank you for coming

Few words about myself

eGovernment

Few words about SEMIC.EU

Few words about the Workshop

General Agenda /1/

I. Welcome

- Methodology: Harmonisation vs. Standardisation
- Semantics-Aware Data Exchange in the Context of SEMIC.EU

II. Sighting National Approaches

- Norwegian Experience with Meeting Public Sector Requirements
- French Experience for a pan-European collaboration
- Report on Germany's Core Components (XÖV)
- Modelling Governmental Information in Greece and Eastern Europe
- The Danish Approach and Insight into OIO DK
- Modelling experience in Italian local Government

Lunch break

General Agenda /2/

III. Panel Discussion

- Introducing the Panel Discussion
- Entities for eGov Interoperability - a European Landscape
- Panel Discussion:
Speakers and Members of the SEMIC.EU Advisory Group

IV. SEMIC.EU – Outlook and Next Steps

- Solving Problems of Semantic Interoperability Conflict
- Closing Remarks

At the end of the day... we should be able to:

- See different methodological decisions and be able to discuss and challenge them.
- Identify any considerations in this regard.
- Identify obstacles faced by administrations and approaches to coping with them.
- What can be considered as priority both from a national perspective and a European one?
- Understand that we are all in the same boat. The need for collaboration.
- Ask more of semic.

Thank you for your attention
