How it works – asset hosting

The screenshot shows the Joinup Semantic Assets website. The header features the Joinup logo, a search bar, and navigation links: HOME, COMMUNITIES, SEMANTIC ASSETS (selected), SOFTWARE, NEWS, EVENTS, E-LIBRARY, and PEOPLE. Below the header, the main section is titled "Semantic Assets" with the subtitle "Share and reuse semantic interoperability assets." A sidebar on the left lists "Semantic Assets" with links to "Catalogue of assets", "Projects", "Federated Repositories", and "Advanced Search". The main content area is titled "One central place to search for interoperability assets" and contains a search form with a text input, a language dropdown (English), a sort by dropdown (Date: Descending), and a "Search" button. Below the search form, two asset listings are shown. The first listing is for "Digikoppeling 2.0" by Forum Standaardisatie, dated 12 March 2013, with a description of Digi Link and a "0 download" count. The second listing is for "NTA 9040 (i.h.k.v. het Ondernemingsdossier) 1.0" by Forum Standaardisatie, dated 12 March 2013, with a description of the NTA and a "0 download" count. On the right side, there is a "Propose your repository" section with a list of links: "Propose your...", "Propose a News Item", "Propose a Community", "Propose your Software Project", "Propose your Semantic Asset Project", "Propose your Federated Repository", "Propose your Semantic Asset Release" (circled in red), "Propose a Document", "Propose a Case", "Propose a Presentation", "Propose an Event", "Propose a Licence", "Propose a Publisher", and "Create a Blog post". At the bottom, there are links to "Subscribe to Newsletter" and "Subscribe to RSS".

How it works – asset hosting

The screenshot shows the Joinup EU Semantic Interoperability Catalogue interface. At the top, there is a navigation bar with the Joinup logo, a search bar, and links for 'Welcome Szabolcs Szekacs', 'My Dashboard', and 'Logout'. Below the navigation bar is a header section with the text 'EU Semantic Interoperability Catalogue'. The main content area is divided into three columns. The left column contains a sidebar with links to 'Semantic Assets', 'Catalogue of assets', 'Projects', 'Federated Repositories', and 'Advanced Search'. The middle column displays the details of a specific asset release, 'Danish Standard industrial groupings for publishing purposes (Bilag 2)'. This section includes a 'View' button, a 'Description' tab, and a 'Distributions' tab. The 'Description' tab is active, showing the asset's submission details, rating, and a brief description. Below the description is a table with two columns: 'Download file' and 'Description'. The 'Download file' column contains a link to 'Bilag 2. Standard industrial groupings for publishing purposes', and the 'Description' column contains a link to 'more'. The right column contains a sidebar with links to 'Propose your Asset Release', 'Export description metadata', 'Propose your...', 'Subscribe to Newsletter', 'Share this on...', 'Rate this Asset release', and 'Related Content'. The 'Rate this Asset release' section shows a star rating and links to 'I use this asset release' and 'Post a comment'. The 'Related Content' section lists several publications from the European Union, including 'New publication: Case study on how Linked Data is transforming eGovernment', 'Sharing data modelling knowledge, experience and guidelines with the Cooperation Project for CISE', and 'Digitaliser.dk will join in the first wave of ADMS enabled federation'.

How it works – repository hosting

The screenshot shows the 'joinup' website interface. At the top, there's a navigation bar with links like 'HOME', 'MY PAGE', 'COMMUNITIES', 'SEMANTIC ASSETS' (highlighted), 'SOFTWARE', 'NEWS', 'EVENTS', 'E-LIBRARY', and 'PEOPLE'. Below this is a search bar and a 'Search' button. The main header area displays 'Semantic Assets' with the tagline 'Share and reuse semantic interoperability assets.'.

On the left side, there's a sidebar with a 'Semantic Assets' section containing links to 'Catalogue of assets', 'Projects', 'Federated Repositories', and 'Advanced Search'. The 'Federated Repositories' link is highlighted with a red box.

The main content area shows a list of repositories. The first entry is 'Dutch Standardisation Forum - "Comply or explain"-standards'. It includes a thumbnail image of the Dutch coat of arms, the submitter 'Forum Standaardisatie' on March 12, 2013, a rating of 5/5, and 64 reads. Below this is a 'Description' section.

The description text states: 'The goal of the Dutch government policy on open standards is to promote interoperability of the Dutch public and semi-public sectors, while at the same time ensuring provider independence. Interoperability means the ability to exchange data electronically; in this case between government bodies and businesses, between government bodies and civilians, and between government bodies. In order to attain this goal, the Standardisation Forum and Board were established in 2006. These institutions do not develop standards, but can assign a status (required or recommended) to existing standards in the public and semi-public sector. The Board and Forum maintain the following two lists: 1) List of open standards for which a 'Comply or Explain'-regime is in place. 2) List of recommended common open standards. Inclusion in the 'Comply or Explain' list means that the Board members have committed to use the standard within their own organisation, and at the same time call upon third parties to also use the standard. Inclusion in the list also means that all government bodies and semi-government bodies are required to adjust their procurement process to the list. When organisations procure an ICT service or product, they are required to choose one of the applicable open standards from the 'Comply or Explain' list ('comply'). Only if this leads to insurmountable problems, may an organisation choose otherwise. However, in this case the annual report must give account of why the different choice was made ('explain'). The 'Comply or Explain' policy is embedded in decree and government agreements. Anyone can submit a standard for inclusion in one of the lists. The standard goes through an assessment procedure during which, based on the consideration criteria and substantive criteria, is determined for which list the standard qualifies, and whether the standard meets the criteria for inclusion in the list.'

On the right side, there's a vertical stack of action buttons: 'Propose your repository', 'Propose your Asset Release', 'Export description metadata', 'Propose your...', 'Subscribe to Newsletter', and 'Share this on...'. Below these is a 'Rate this Repository' section with a star rating and a 'Post a comment' link. At the bottom right, there's a section for 'Available translations' (showing 'Dutch') and 'Related Content' (listing a document from 21 January 2013).

Benefits of hosting your **Repository** on Joinup

- **European exposure**
- **Multilingual support** (*more to come...*)
- **No lock-in – your data is free!**
- **Committed team – long term solution**

Benefits of using **Joinup** for your assets

- **Start small, evolve as you see fit**
- **No / little initial investment needed**
- **Sustainable service**
- **Reusable, open solution**
- **We are committed to Joinup!**
