

## OCS RELEASE MANAGEMENT MEETING

3 May 2013

### SUMMARY REPORT

#### PARTICIPANTS

##### Present in the Meeting room:

Marc Vanloo, Kenny Irvine, Michael Franze, Daniel Chirita, Francisco Gimeno

#### ACTIONS FROM PREVIOUS MEETINGS

- Daniel presented some possible enhancements in the OCS export process. The board agreed with the new export process. The new diagram will be included in the OCS architecture document.
- The creation of issues in joinup for the “optional validation rules”, “including Croatia in OCS” and “changes in the Annex III” is still outstanding.

#### OCS 1.4.0 REQUIREMENTS (SUITE)

Issue #	Issue name	Comment
64532	User interface for downloading exported statements of support	<ul style="list-style-type: none"><li>• Running several export in parallel won't be allowed (export button will be disabled until previous export completes).</li><li>• No cancel button after the launch of the export.</li><li>• All the exported files for a country will be zipped in a single file; and all the country zips will be included in a single export zip file.</li><li>• After the changes in export are implemented, performance tests will be run in 2 configurations: GlassFish/MySQL and Weblogic/Oracle.</li></ul>
64537	Export statements of support into a single ZIP file	
62896	Handle 'HEAD' requests	This seems to be a low priority request.
61476	Enable interface customization without jeopardizing certification	There are 2 possible approaches that will be submitted to the Change Management board for final decision.

**ANY OTHER BUSINESS**

As Friday May 10<sup>th</sup> is a public holiday in Belgium, the next meeting of the OCS Release Management board will take place in 17 of May.
