Version 1.2.2

Release Note

1. INTRODUCTION

This document communicates the modifications implemented in the EUSurvey OSS v1.2.2

2. ABOUT THIS RELEASE

The following modifications have been implemented with the new revision of the system:

2.1. New features

- Page numbers added to all pdf exports
- Date and time of the submission are now shown on top of the pdf version of the contribution, as well as the access link page for access with tokens
- Delete contributions functionality on the Results page

2.2. Different enhancements targeting system's usability

- Date question box has been enlarged
- Results page now has a scroll bar to scroll within cells with many entries (File Upload questions only)
- Margin of text element in pdf exports have been changed to improve readability
- Importing wrong file formats now triggers an error message
- Filter settings on the Results page are now saved for the next logins

2.3. Different bug-fixes affecting the system's usability

- Logos cannot be deleted
- Menu tree on help page cannot be expanded
- “Refresh” and “Reset” buttons on publication page cannot be clicked
- “My latest Contribution” on dashboard page shows wrong number of contributions
- Number of replies on Overview page and on survey page do not match
- Users cannot scroll down in table questions
- Text and button overlap in non-english language mode
- Missing table rows in print preview
- Date questions accepts incorrect date formats
- User without global privileges to contact management sees link to address book
