Open Source Observatory Community

What is it?

The Open Source Observatory is a **community** where public administrations can exchange **information, experience** and **best practices** around **open source solutions**

Open source software is software that can be freely used, changed and shared.

In practice it ...

Keeps you up to date on developments around open source in Europe's public administrations.

Allows you to access our growing collection of software solutions and read all the latest news on implementations, strategies and policies.

Helps you build the case for your own open source ICT strategy.

Offers in-depth case studies and policy recommendations from Innovation Champions.

OSOR community provides ...

software development

open data

eGovernment services

document management

database applications

content management

citizen participation

geo-information systems
