c-BEMS, a cloud-based SaaS tool for Building Energy Management System

Rocket your Energy & Environmental Savings now!

Up to 80% of building energy goes to HVAC & lighting

PROBLEM

- ❑ Buildings Sector #1 in Energy Consumption in EU (40%) and 36% in CO₂ emissions.
- ❑ 220 million energy inefficient buildings (EU) (10% Public ones) - NextGenerationEU - €672.5 billion

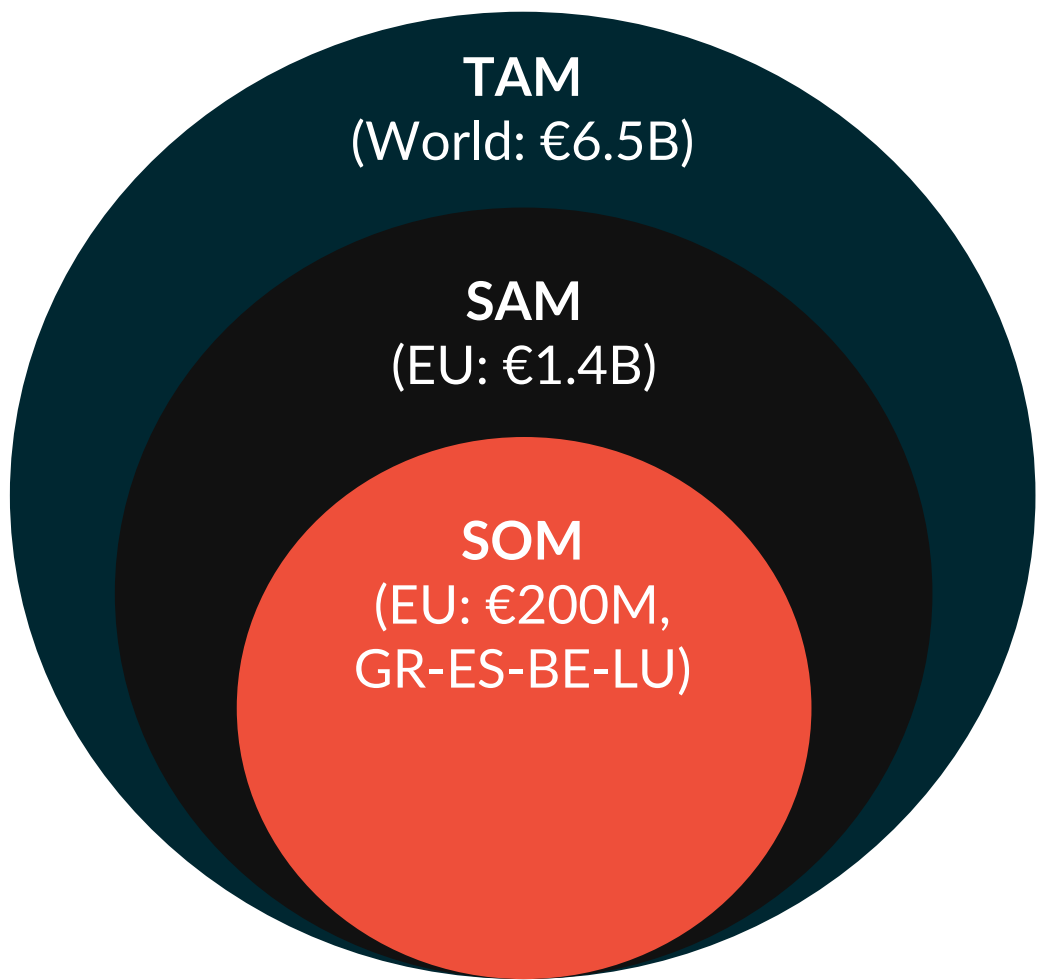

SOLUTION

- ❑ c-BEMS brings **25% less installation costs** (Cloud vs Edge computing)
- ❑ **Plus 40% on energy savings** with the use of Artificial Intelligence
- ❑ **Plus a CO₂ emissions calculator** as a selected company by EU to collaborate with Carbon Trust and Deloitte

A **€20B** emerging market ('29) with **12.4% CAGR** for BEMS

We will capture 0.25% of TAM in 2027!

First **cloud-based** BEMS **unified IoT** platform powered by **AI**

▶ Self-learning/adjusting (A.I.) system based on occupant's preferences

▶ Wireless Cloud-based (**faster**) SaaS for BEMS

▶ Remote control of **multi-zonal** HVAC/lighting

▶ For any kind, size and complexity of building(s)

▶ **User friendly** unique certified IoT Platform

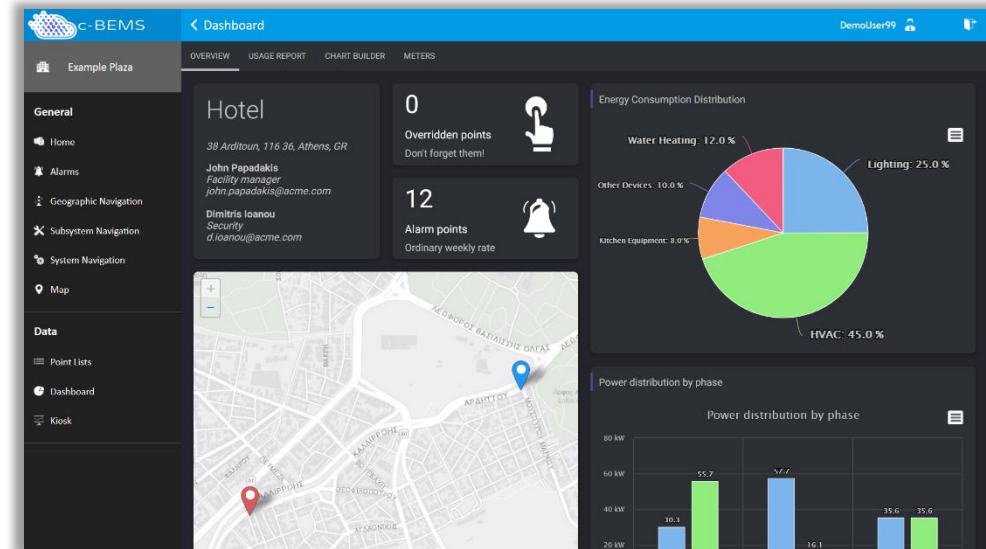

▶ Monitor and control **multiple** buildings

▶ Provides **CO₂** emissions calculator

▶ **End-to-end solution** so that client(s) does not worry!

Patented
(EP3964916A1-2022-03-09)

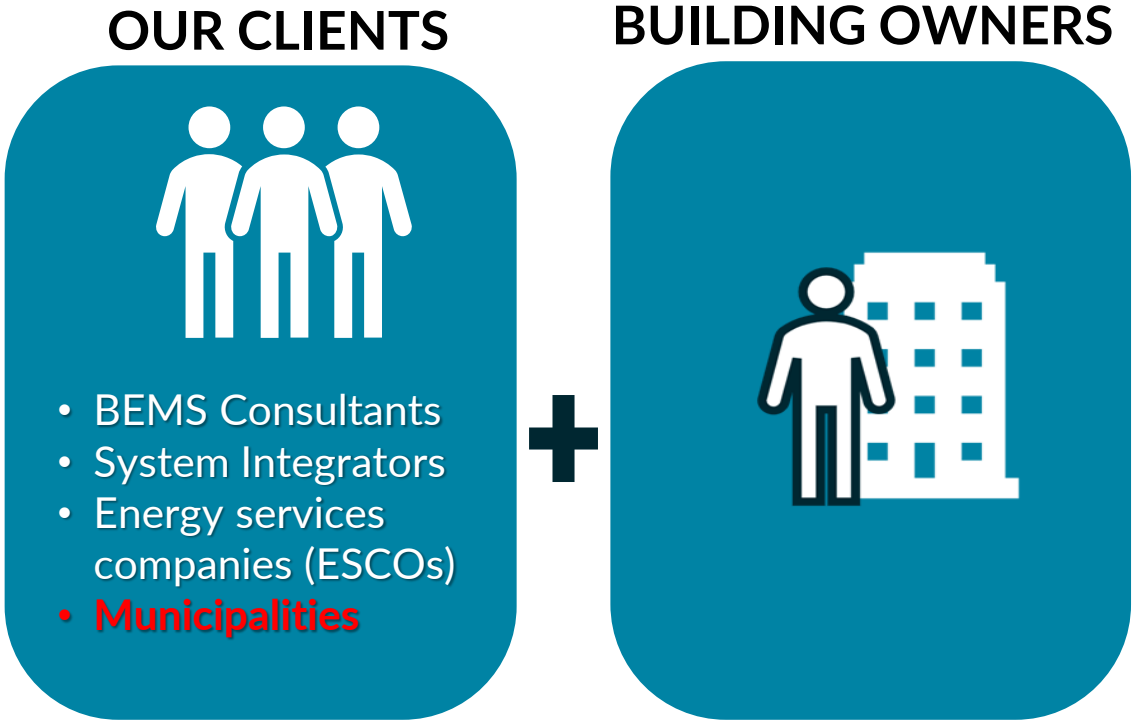

Direct (SaaS) & Indirect (same client but no SaaS) Competitors

	Up to 40% Energy savings	CO ₂ emissions calculator	Compatible with different devices and protocols	Self learning/ adjusting	Cloud - based

12-months SPP - Pick the right package for your building(s)

Commercialization & Marketing Strategy

Early Market Traction

- 8 Pilots (GR, BE, LU, ES) with 85% conversion
- 10 B2B/B2G Clients
- Signed B2G 1MEUROS contract
- 30 Buildings (20Pu-10Pr)
- 4 Countries
- 25,000 m²
- *4 letters of intent signed/to be signed*
- *11 Major Companies-Organizations in discussion*

16 Buildings (10 schools-6 offices)

Luxury Hotel

CITY OF THESSALONIKI >100 Buildings

Deep experience across energy technology & business

Strong expertise (60-years) and talent to become #1 in Smart Cities solutions!

Institutional actors & facilitators of the innovation ecosystem

Universities & Research Centres

Industrial, Public & Investment Partners

What we are looking for!

- 900KEUROS on Seed Round**
 - 12-months of runway to work on**
 - Product market fit**
 - Sales**
 - Marketing**
 - Establish and grow product in at least 4 EU countries**

- Strategic Partnerships with Medium/Large Companies in the TelCo, Construction/Real Estate, Hotel, Energy/ESCO industries under**
 - License agreement**

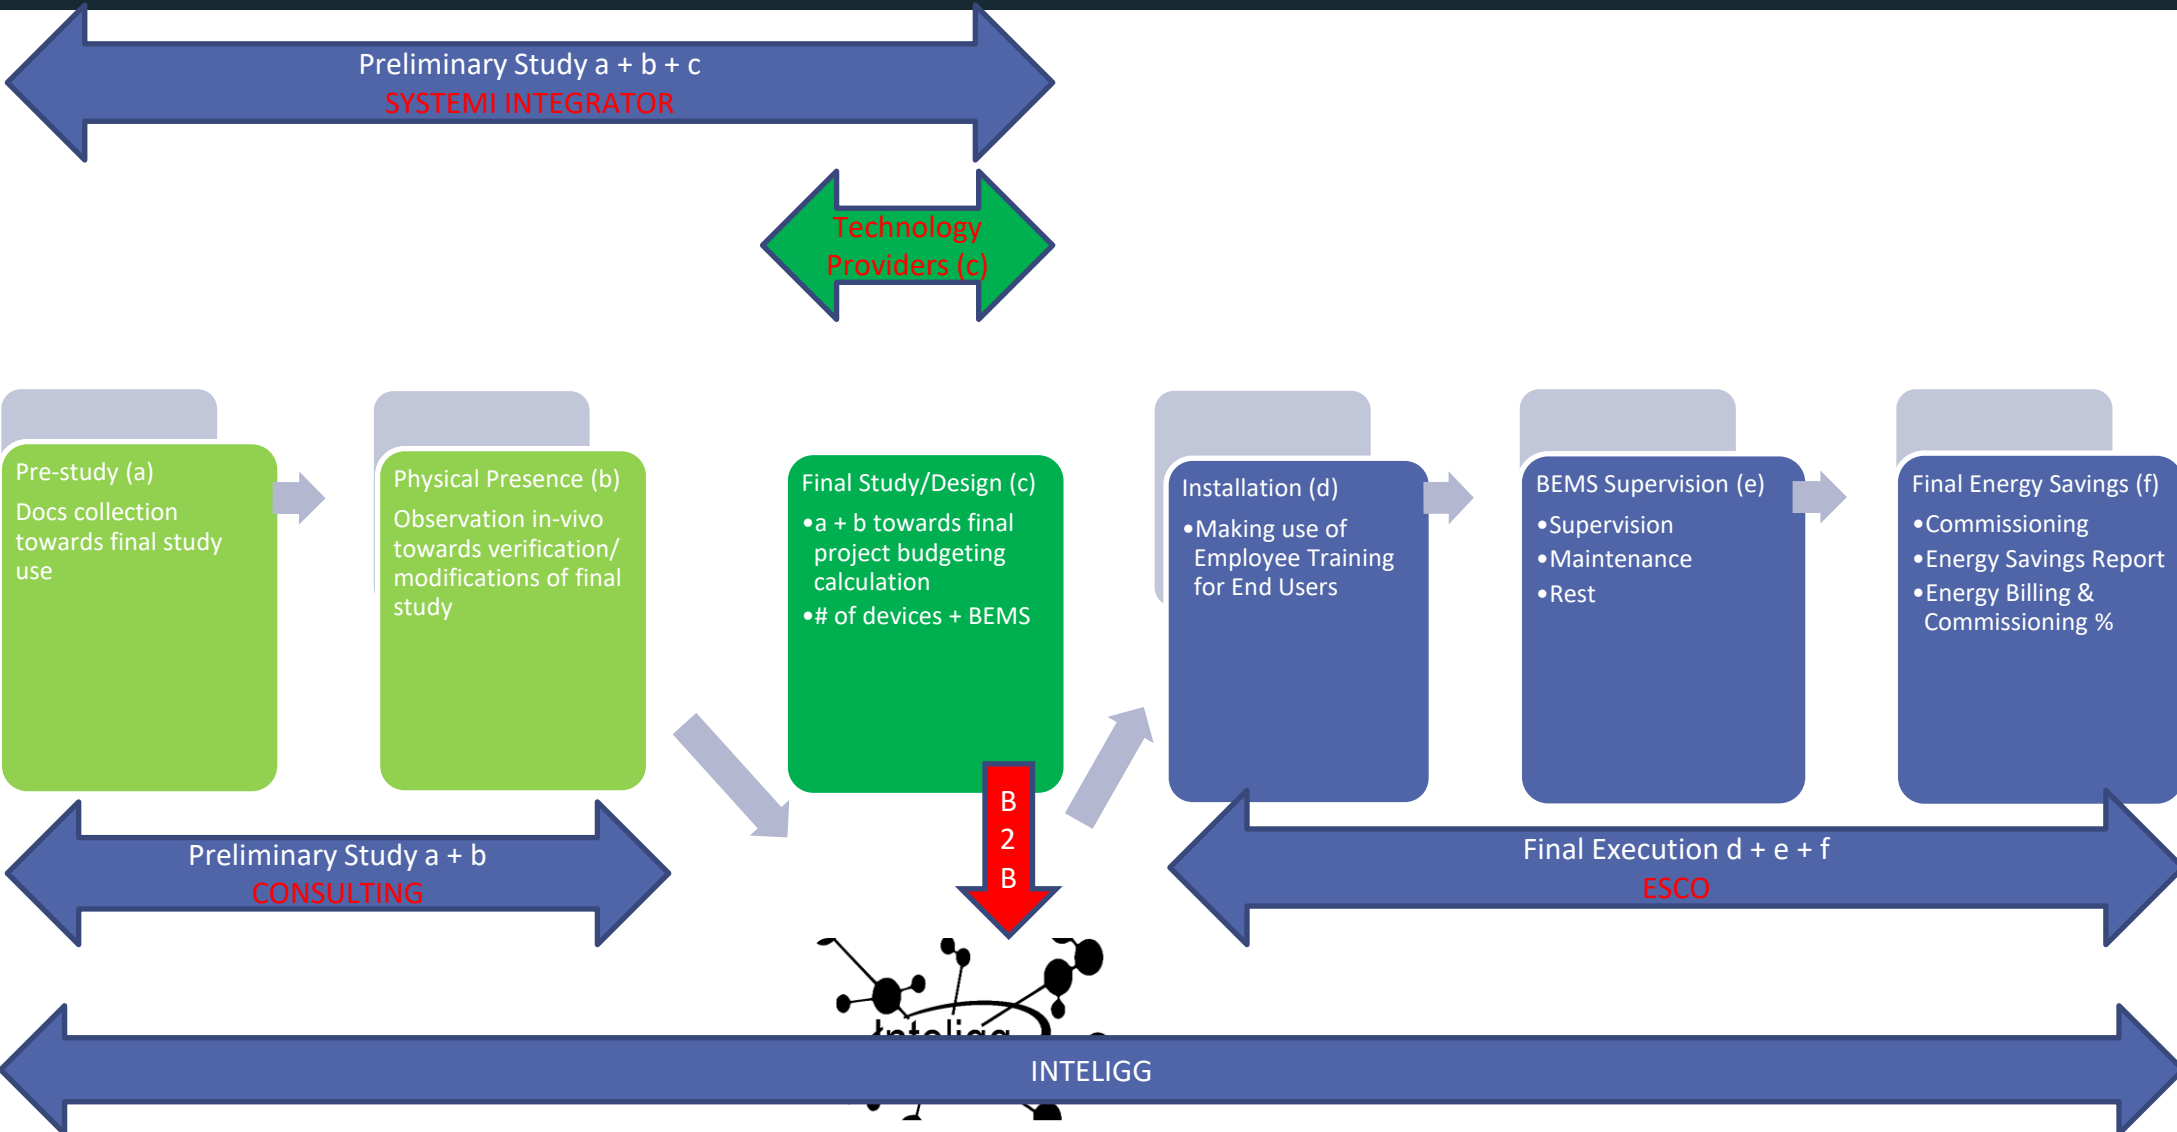

- Plan to raise further on Seed Round A > 5M EUROS in ≤18-months duration to**
 - Expand further in more countries (EU and USA)**

A **Unique** CO₂ emissions **calculator** for Buildings

Inputs	
Country	Romania
Building Type	Apartment
Surface area (m ²)	100
Current natural gas energy usage (KWh)	1,100
How is the energy usage measured?	Yearly
When was the meter reading taken?	2020

Note that as temperatures for Romania in 2020 were lower, average energy usage may be higher.

Results		
Expected yearly energy usage before solution in an average year	1,112	kWh/year
Expected yearly energy usage after solution	708	kWh/year
Yearly energy savings	404	kWh/year
Energy saved	36%	
Total carbon savings enabled	81.2	kg CO ₂ e/year

Inputs		
Country	France	
Building Type	Office	
Surface area (m ²)	280	
Current natural gas energy usage (KWh)	225	
How is the energy usage measured?	monthly	
When was the meter reading taken?	2021	July

Results		
Calculated energy usage in July 2021 with solution	218	kWh/year
Expected yearly energy usage before solution in an average year	85,109	kWh/year
Expected yearly energy usage after solution	82,438	kWh/year
Yearly energy savings	2,671	kWh/year
Energy saved	3%	
Total carbon savings enabled	540,9	kg CO ₂ e/year
