

Driving sustainable development via municipalities

Municipalities have a tremendous potential

>67%

of SDGs can only be reached via the municipal level

~98 %

of organisations' sustainability initiatives fail

<3%

set clear goals and monitor their activities

Administrations often cannot yet use their lever

Clarity and starting point

Human and financial resources

Evidence-based decision making

Data, digital infrastructure and processes

We enable evidence-based public services

Data for understanding of sustainability potentials

Tools and processes for data-based decisions

Impactful and effective public services

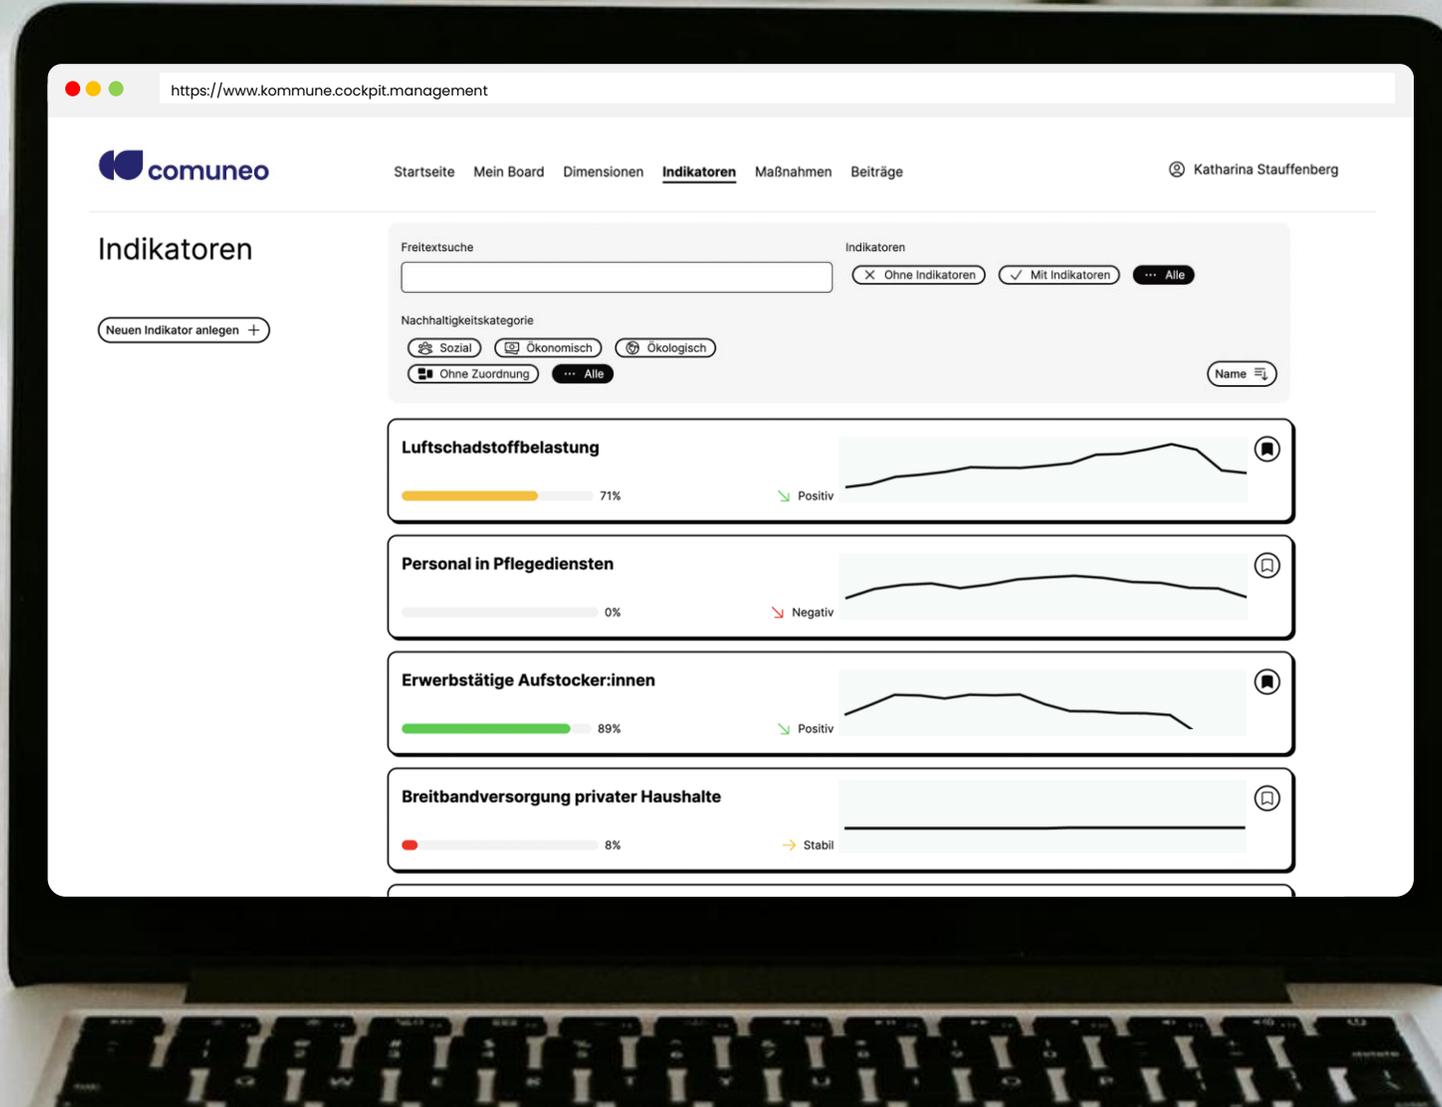

Sustainable future for people & planet
