[BR22] System Wide Requirements

System Wide Requirements	
Summary	
ID	BR22
Initiative	BRIS
Short description	Methodological document describing in detail the needs, features and requirements agreed by all the Member States for the development of BRIS.
	The interest of this document lies in the exhaustive classification of the requirements, and the great level of detail and technical rigor of the text describing the requirements.
	The document is based on the requirements and templates provided by the Commission's PM2 and RUP@EC methodologies.
Owner	DG JUST Unit A3
