[DK03] Data Distributor
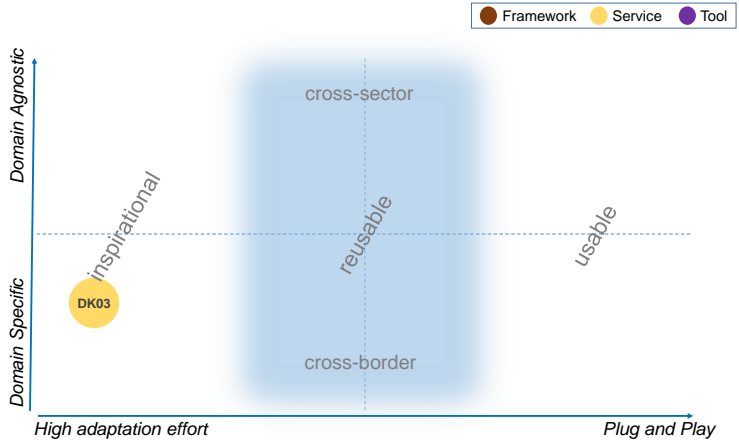

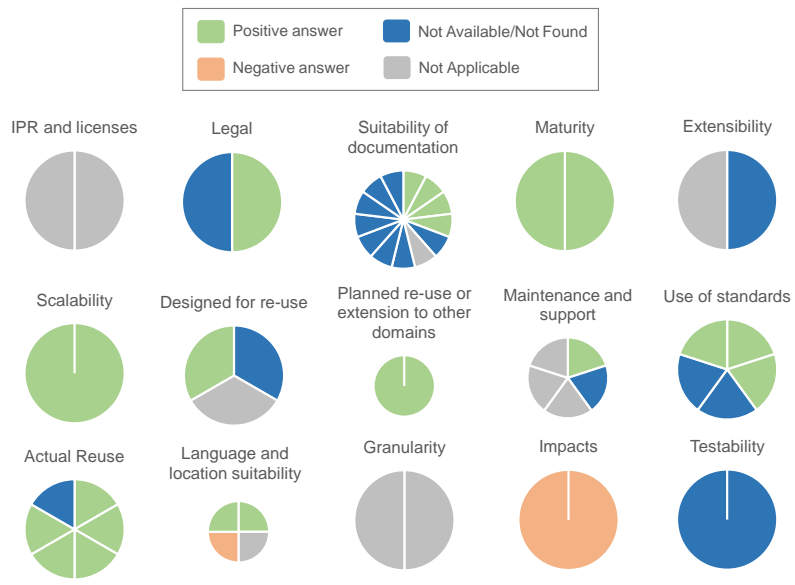

Data Distributor	
Summary	
ID	DK03
Initiative	Intermediation platform enabling data distribution
Short description	The Data Distributor will be the common authoritative distribution point for Basic Data in Denmark, making easier and cheaper to publish and use authoritative Basic Data.
Owner	Denmark (national government)
Contact	Danish Agency for Digitisation Arndt@digst.dk
Type	Service
Sub-Type	Operational application
Context	Cross-sector, Cross-border
Base Registry type	Business, People, Land, Address, Real Estate
Operating model	Developed and operated by private contractor (KMD A/S) on behalf of the national government in order to consolidate the distribution of Basic Data enabling one stop shopping of Basic Data and reducing the need for local copies of Basic Data within cross domain services e.g. for data about both businesses and their owners.
IPR	Public domain
Status	Under development
More details	
Aggregated business need	ABN – 11 Need for automation of data exchange
Functionalities	Web services for accessing Basic Data File downloads of Basic Data Distribution of event notifications (for EDA) regarding Basic Data.
Design/Architecture	
Technologies	Microsoft technologies – Windows server and .Net are supplemented by FOSS such as GeoServer and MySQL.
Specifications	The solutions relies on numerous technical standards and specifications such as: ISO/IEC 27001 INSPIRE OGC standards (WMS, WFS, WMTS etc.)
Management	TBD
Governance	The Danish Geodata Agency is the responsible authority for implementing and operating the solution. Each Basic Data Registry is responsible for their own data and services as well as user rights administration.
Sustainability	The solution is permanent. The current contract entails operations until the end of 2022.
