

[EE01] X-Road (the EE Interoperability Framework)

X-Road (the EE Interoperability Framework)	
Summary	
<b>ID</b>	EE01
<b>Initiative</b>	Estonia
<b>Short description</b>	<p>The Estonian Interoperability Framework (Interoperability Framework of the State Information System) provides the most relevant decisions concerning open standards. Public sector agrees, at the guidance of the open standards working group and in cooperation with other concerned parties, on the minimum set of public sector open standards, compliance with which is compulsory for the public sector. The choice and assessment of standards is public and balanced.</p> <p>It lists the most relevant open standards, which institutions should use when communicating with one another, or the public, on web sites and in public registers. With regard to in-house communication, institutions are allowed, although it is not recommended, to use other formats.</p>
<b>Owner</b>	Ministry of Economic Affairs and Communications
<b>Contact</b>	Not Available/Not Found
<b>Type</b>	Framework
<b>Sub-Type</b>	Strategy
<b>IPR</b>	Not Available/Not Found
<b>Status</b>	Operational

Reusability	
<b>Landscape</b>	<p>The diagram illustrates the reusability landscape for interoperability frameworks. It plots various initiatives based on their domain specificity and adaptation effort. The 'reusable' region (shaded blue) is characterized by high domain agnosticism and moderate adaptation effort. The 'usable' region (white) is characterized by high domain agnosticism and low adaptation effort. The 'EE01' framework is located in the 'usable' region, indicating it is highly reusable and easy to integrate.</p>
