

[ES10] Data Boxes MetaPosta website

Data Boxes MetaPosta website	
Summary	
<b>ID</b>	ES10
<b>Initiative</b>	Basque Government
<b>Short description</b>	<p>Under the names “Electronic Post Box”, “Safe electronic box” and “Certified e-mail”, a large number of digital services, designed to take on the same role in the electronic world as the traditional mailbox, are currently in operation throughout the world.</p> <p>In addition to receiving documents, electronic strongbox systems offer members of the public and businesses safe, permanent storage services for valuable documents that they wish to store in their own personal space.</p> <p>Over recent years, virtually every country in Europe has begun to operate public, private or mixed strongbox systems. The importance of these systems as High Impact Services, as the driving force behind the Information Society and eGovernment or as supports for sector applications, is on the increase and as key enablers of technological resources such as digital identity, electronic signature services and inter-operability between applications.</p>
