

DCAT Application Profile	
Summary	
ID	EU18
Initiative	ISA
Short description	<p>The DCAT Application profile for data portals in Europe (DCAT-AP) is a specification based on the Data Catalogue vocabulary (DCAT) for describing public sector datasets in Europe. Its basic use case is to enable cross-data portal search for data sets and make public sector data better searchable across borders and sectors. This can be achieved by the exchange of descriptions of datasets among data portals.</p> <p>In February 2015, the ISA Programme of the European Commission has started an activity to revise the DCAT-AP, based on experience gained since its development in 2013. A new version of DCAT-AP is expected to be released after November 2019.</p>
