

GENIS ISA Action 1.11	
Summary	
<b>ID</b>	EU29
<b>Initiative</b>	ISA
<b>Short description</b>	<p>GENIS designs, develops and implements services that will manage and support the exchange of information between Member States and the Commission within the State Aid Notification Process.</p> <p>It is set up by reusing existing components, building blocks and services modules, in particular those developed by the actions "e-PRIOR – eProcurement platform" and "e-TrustEx – Trusted Exchange Platform".</p> <p>The action will permit Member States to transmit data directly from their back-office systems to the EU Commission, thereby avoiding the manual encoding of data.</p> <p>GENIS covers the exchange of structured and unstructured data, notably:</p> <ul style="list-style-type: none"> <li>- pre-notification and notification of State Aid measures by the Member States to the Commission;</li> <li>- yearly revision of State Aid notifications (real expenditures) by the Member States;</li> <li>- management of communication and workflows (documents, messages, mails) between the Commission and the Member States during the State Aid Notification Process.</li> </ul> <p>Moreover, it will provide a service to adapt the IT systems dealing with State Aid notifications in case of changes in State Aid legislation.</p> <p>To support interoperability, the GENIS action will implement open interfaces (e.g. web-services) for Member States to connect their back-offices with existing Commission systems.</p>
