

SEMIC - “10 Rules for Persistent URIs”	
Summary	
ID	EU36
Initiative	ISA ²
Short description	<p>This document explores best practices on the publication of Uniform Resource Identifiers (URI) sets, both in terms of format and of their design rules and management.</p> <p>The recent development of open data and the desire to increase its interoperability have led to an increased reliance on URIs as identifiers for a wide variety of concepts; everything from languages to buildings, government departments to currencies. So, as a conclusion of this study, ten rules were proposed to enforce the correct implementation of the Persistent URIs.</p>
