| Political Communications	Legislations	Infrastructures	Governance
In 2023, the Czech government launched the project on migration of central state administrations' websites to the single @gov.cz domain. The draft "Decree on the long-term management of public administration information systems" is currently under examination and the Government Office Team works with public administration authorities on their migration schedule.	As of January 2023, the amendment of the Act on electronic procedures and authorised conversions of documents came into force. Data mailboxes, the national eDelivery tool for communication with public authorities, are from now on automatically created also for all freelancers and legal entities, including associations and foundations. To support this significant step towards digital transformation of public services, an extensive promotion campaign focusing on benefits of online communication with the State was carried out, as well as new users support initiatives.	In the context of the European digital innovation hubs network, the IT4Innovations National Supercomputing Center is a leading research, development, and innovation centre active in the fields of High-Performance Computing, Data Analysis, Artificial Intelligence, and Quantum Computing and their application to other scientific fields, industry, and society. Together with the CESNET and CERIT-SC institutions, IT4Innovations constitutes e-INFRA CZ, a strategic research infrastructure of the Czech Republic. The key research areas include big data processing and analysis, machine learning and advanced visualisation.	Since 1 April 2023, the newly established Digital and Information Agency of the Czech Republic manages key national digital government projects and serves as a competence centre for sectoral digital strategies and user research. To achieve better cross-sector cooperation, the Deputy Prime Minister for Digitisation also serves as Chairman of the Government Council for Information Society, the responsible body of the government for the development of digital government services.
