Latest Initiatives

Political Communications

In August 2022, the Federal Ministry for Digital and Transport (BMDV) published its new Federal Digital Strategy. The strategy defines three key projects, which are the prerequisite for boosting digital transformation: (1) Network rollout and improving standardised provision of data; (2) Providing digital identities, not only for the use of public administration services; and (3) Creating uniform framework conditions and standards to allow the highest degree of interoperability.

In addition, the first Startup Strategy of the Federal Government was adopted in 2022 with the aim to improve the start-up ecosystem and GovTech in Germany and Europe.

Legislations

No recent legislations have been reported to date.

Infrastructures

In 2022, the German Metadata Portal GovData was opened for metadata by companies in general services, universities, researchers, research institutions and research funding institutions.

Regarding connectivity, the first version of the Gigabit-Register went online in December 2022 with updated data for fixed- and mobile-network expansion in the German Broadband Atlas. In 2023, the Gigabit-Register will be further developed in close cooperation with the users of the services.

Governance

No recent changes on governance have been reported to date.
