The government adopted the [National Digitalisation Strategy 2022–2030](#) in November 2022. The government adopted the [National Digital Citizen Programme 2022–2026](#) in December 2022 as a sectoral strategic programme introducing the ‘digital citizen’ concept. This concept aims to reinterpret the relationship between the State and the citizen based on the digital identity initiative launched by the EU, through basic services (eID, eDocuments, ePayment, etc) and user-friendly channels operating on a single platform, with a ‘mobile first’ approach.

The [Public Data Act](#), which regulates the reuse of public data and public cultural data held by public bodies (and private bodies with a public service mission) by private persons or entities, was modified in 2022 to implement the Open Data Directive (Directive (EU) 2019/1024), ensuring full harmonisation with EU law in this regard.

The [Client Gate+](#) (Ügyfélkapu+) service is a further developed version of the popular Client Gate eID service. Client Gate+ provides a two-factor authentication, where the first factor are the Client Gate username and password, and the second factor is a one-time password generated by an authenticator application that can be installed on a mobile device. Client Gate+ was launched on 3 June 2022.

According to Government Decree 307/2022 (VIII 11), the [Digital Hungary Agency](#) has been established under the Cabinet Office of the Prime Minister to take responsibility for strategic governance, policy formulation, project planning, definition of policy criteria for development projects, provision of eGovernment building blocks and supervision of ICT public procurement belong now to the responsibilities of the Digital Hungary Agency.
