

[OS17] IATI Standard Consolidating Rules for Maintenance of Code Lists

IATI Standard Consolidating Rules for Maintenance of Code Lists	
Summary	
ID	OS17
Initiative	IATI
Short description	<p>These rules were agreed at the IATI TAG workshop in May 2012 and accepted by the Global Partnership for Effective Development Cooperation when the Busan common standard containing these rules was formally agreed in June 2012.</p> <p>To ensure the integrity of IATI's use of code lists, the following standard-wide rules should be adopted and applied as rigorously as possible. This is particularly important as we move forward to a new common standard. Nothing new is being proposed here: other than a move from informal to formal practice.</p>
