Reusability	
<b>Landscape</b>	<p>The diagram illustrates the reusability of the CEIS framework. The Y-axis represents the domain specificity, ranging from 'Domain Specific' at the bottom to 'Domain Agnostic' at the top. The X-axis represents the adaptation effort, ranging from 'High adaptation effort' on the left to 'Plug and Play' on the right. The matrix is divided into four quadrants: 'inspirational' (bottom-left), 'reusable' (center), 'cross-border' (bottom-right), and 'cross-sector' (top-right). A blue shaded area covers the 'reusable' and 'cross-border' quadrants, indicating a high level of reusability. A brown circle labeled 'UK01' is positioned in the 'cross-sector' quadrant, indicating that the CEIS framework is highly reusable and adaptable. A legend at the top right indicates: Framework (brown circle), Service (yellow circle), Tool (purple circle).</p>
