Why use open source in public administration:

① Because you need to move fast. Reusing digital building blocks allows you to intervene fast

② Because you need to run tested solutions that address the problem the right way.

Why use open source in public administration:

- ① Because you need to move fast. Reusing digital building blocks allows you to intervene fast
- ② Because you need to run tested solutions that address the problem the right way.
- ③ Because the user needs consistency and standardisation. And you need data and information.

Why use open source in public administration:

- ① Because you need to move fast. Reusing digital building blocks allows you to intervene fast
- ② Because you need to run tested solutions that address the problem the right way.
- ③ Because the user needs consistency and standardisation. And you need data and information.
- ④ Because you need to stay independent and have control over your public service software

Why use open source in public administration:

- ① Because you need to move fast. Reusing digital building blocks allows you to intervene fast
- ② Because you need to run tested solutions that address the problem the right way.
- ③ Because the user needs consistency and standardisation. And you need data and information.
- ④ Because you need to stay independent and have control over your public service software
- ⑤ Because you are using public funding.

SUCCESSFUL EXAMPLES OF REUSING OPEN SOURCE TOOLS IN PUBLIC ADMINISTRATION.

Highly reusable digital tools

① Participatory budgeting for local municipalities

② Website builder for public administration

③ Case management for vulnerable groups

Prerequisites:

① Standards

② Procedures

③ Collaboration

SHARE & REUSE
