- **Structure:** LLM works at **sentence level/document level** and this approach is not capable to understand the structure (e.g., sequence of articles)
- **Context:** LLM loses the **context** (e.g., jurisdiction, temporal parameters)
- **Innovation:** LLM depends to the **past data series** (e.g., new brilliant solution has no historical series)
- **Reference:** ML does not consider the **normative and juridical citations**. The normative references evolve over time (e.g., art. 3 is not the same forever)
- **Time:** the LLM is **timeless** and the legislation is integrated in the legal system
