A user's journey through the interoperable europe Portal

Business Manager:
Bernard CLAES

Agenda

- Introduction
- The Interoperable Europe Act
 - Policy space
 - Governance
 - Solutions page
 - Assessments tool
 - Interoperable Europe Monitoring
 - Interoperable Europe Academy
 - Support Centre
- Feedback/Q&A

Introduction

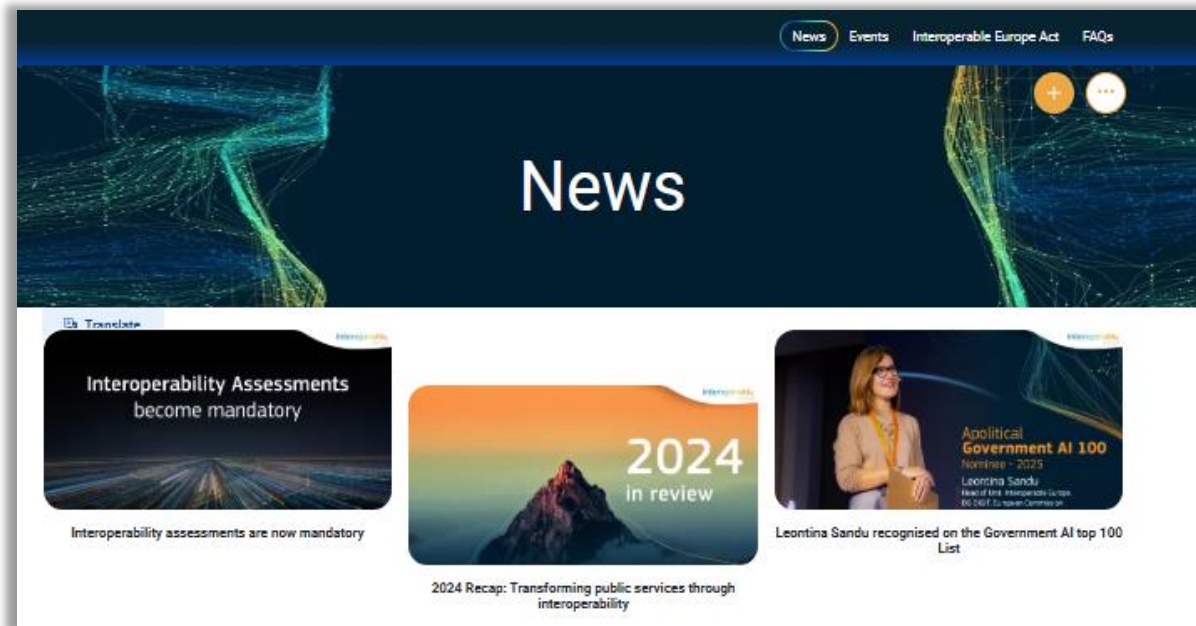

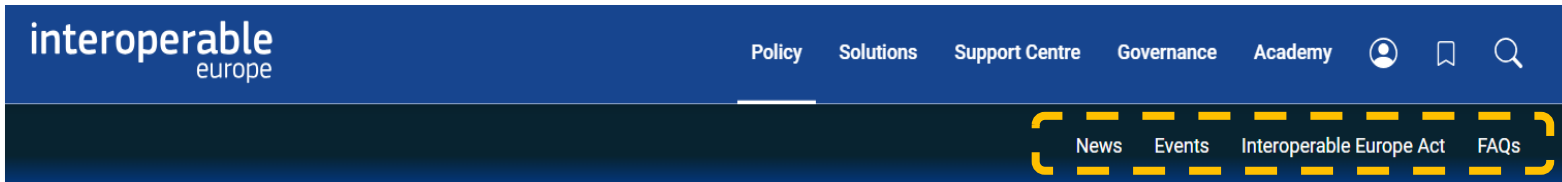

- **Interoperable Europe** is the initiative for a reinforced public sector interoperability policy
- The **Interoperable Europe Portal** is the single point of entry for information related to cross-border interoperability of digital public services
- The Portal acts as the one-stop-shop for interoperability and all needs related to the **Interoperable Europe Act**

The Interoperable Europe Act

Policy space

The former Interoperable Europe Hub. Includes:

- A dedicated page for news on digital public services & cross-border interoperability, such as **news** items, **interviews**, etc.
- A dedicated page **events** on digital public services & cross-border interoperability
- A dedicated page for the **Interoperable Europe Act**, where users can find information on the Act
- A dedicated **FAQ** page

Interoperable Europe Board

Board Members

Interoperable Europe Community

National competent authorities and interoperability coordinators

Working groups

Meetings

Documents

- A new space dedicated to the **Interoperable Europe Board, Assessments and EU Digital Funding Opportunities**
- On the **Board** page, users can find information on the Board's composition, responsibilities, task, activities & important documents

Solutions page

Support Centre

Explore the solutions

Software solutions

Software to install or services to build European digital public services

Other solutions

Core vocabularies, architecture, frameworks, specifications, e-Learning

- A space dedicated to the **solutions** of the Portal.
- These solutions types offer further **categorisation**, i.e. Data models, Learning, Services ("Software as a Service") etc.
- Curated content: users can find the top 100 interoperability solutions.

The screenshot shows the 'Interoperability assessments space' website. At the top left is the 'interoperable europe' logo. The main title is 'Interoperability assessments space'. Below the title, it shows '0 Solutions' and '37 members'. There are three topic tags: 'Digital-ready policymaking', 'eGovernment', and 'European Policies'. A navigation bar includes 'Welcome', 'Assessment Guidelines', 'Submission', 'Assessment reports', and 'Assessment Forum'. The main content area is titled 'Welcome' and features four cards:

- Guidelines for interoperability assessments**: Discover the guidelines for interoperability assessments adopted by the Interoperable Europe Board.
- Draft and publish a report**: Draft and publish an interoperability assessment report.
- Discover existing reports**: Check out the existing interoperability assessment reports.
- Share and explore**: Share your experience with the wider implementing community and explore new input and best practices.

- A new space dedicated to **interoperability assessments**.
- Provides comprehensive **instructions** for conducting interoperability assessments.
- Assists users to **perform or upload** an interoperability assessment.
- A **repository** of all interoperability assessments published.
- Provides an **interactive platform** for discussions & for sharing experiences.

Interoperable Europe Monitoring

The Act

Policy

Governance

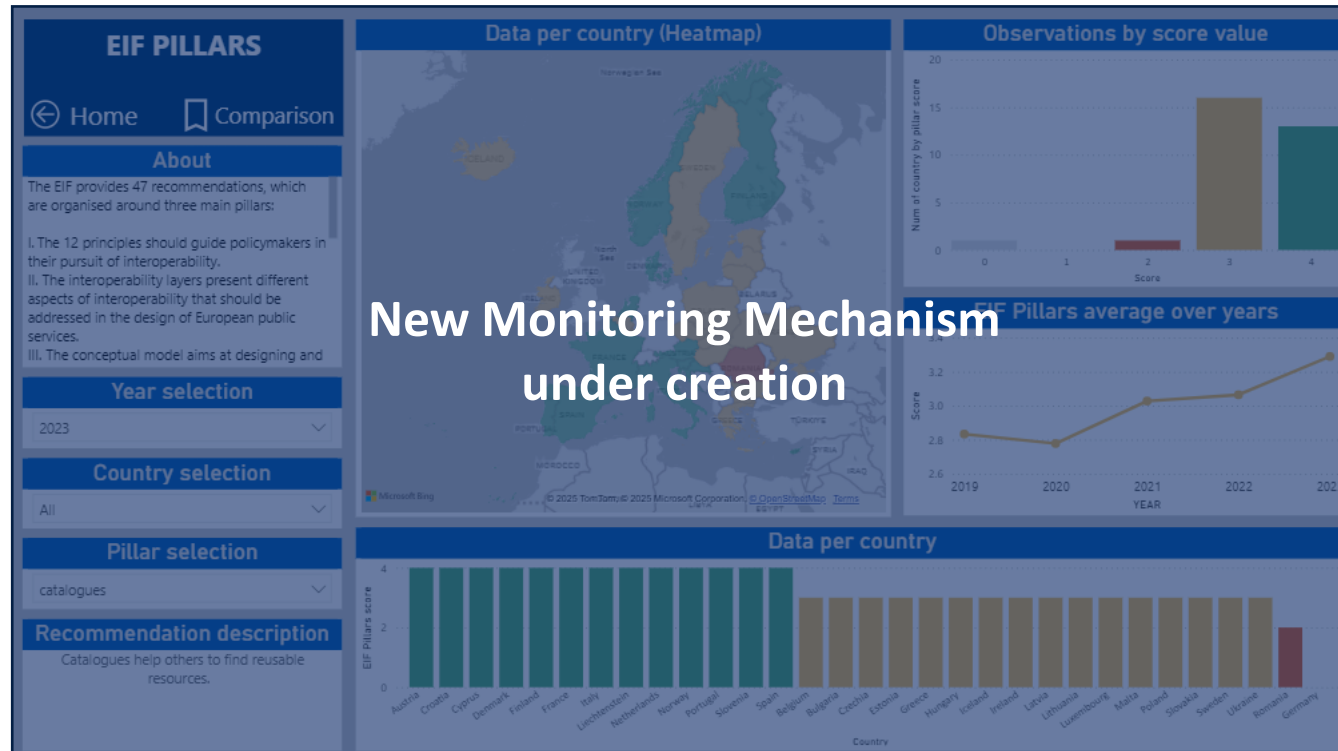

Solutions

Assessments

Monitoring

Academy

Support Centre

- “Monitor the development of trans-European digital public services to support evidence-based policymaking” **Article 20 of the IE Act.**
- From National Interoperability Framework Observatory (NIFO) to the **Interoperable Europe Monitoring** as it evolves in line with Act requirements.
- A **new Monitoring Mechanism** will be presented for approval to the Board in May 2025. Its results will be displayed in the monitoring space.

Welcome to the Interoperable Europe Support Centre!

The Centre offers various services on legal, semantic, technical and organisational aspects to improve the interoperability of European digital services.

Via this page, you may find appropriate training courses, frameworks, architectures, core vocabularies and reporting on interoperability for public administrations.

You can also make a support request and we will do our best to help you.
