# Putting food related emissions into perspective

Helping companies measure GHG emissions and environmental impact from food aligned with the **CSRD (ESRS 1-4)** and reduce CO<sub>2</sub>e emissions aligned with the EU's 2030 targets of net 55% reduction.

On average, Klimato users have reduced their food emissions by **10.9%** YoY for three consecutive years.

# Environmental impact

Greenhouse gases

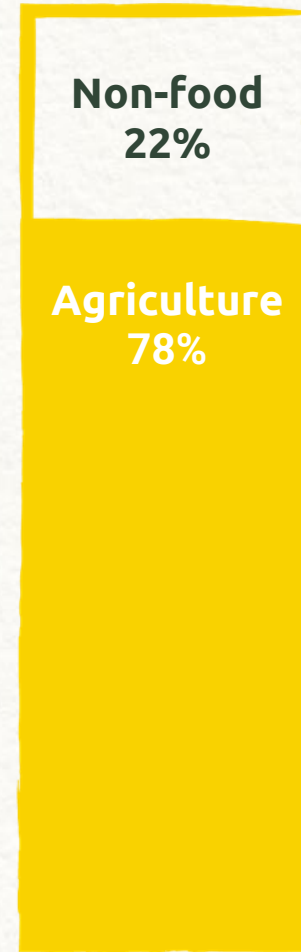

Land use (m2)

Freshwater use

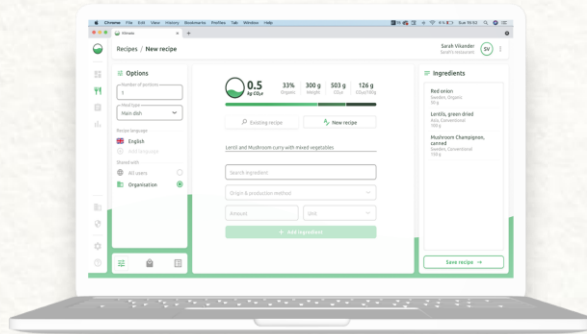

Eutrophication

Biodiversity

# Sustainability software for food companies

## Calculate

the climate impact  
from recipes & food products

## Communicate

the carbon footprint on  
menus and product packages

## Report

Set goals, cut emissions  
and track your progress

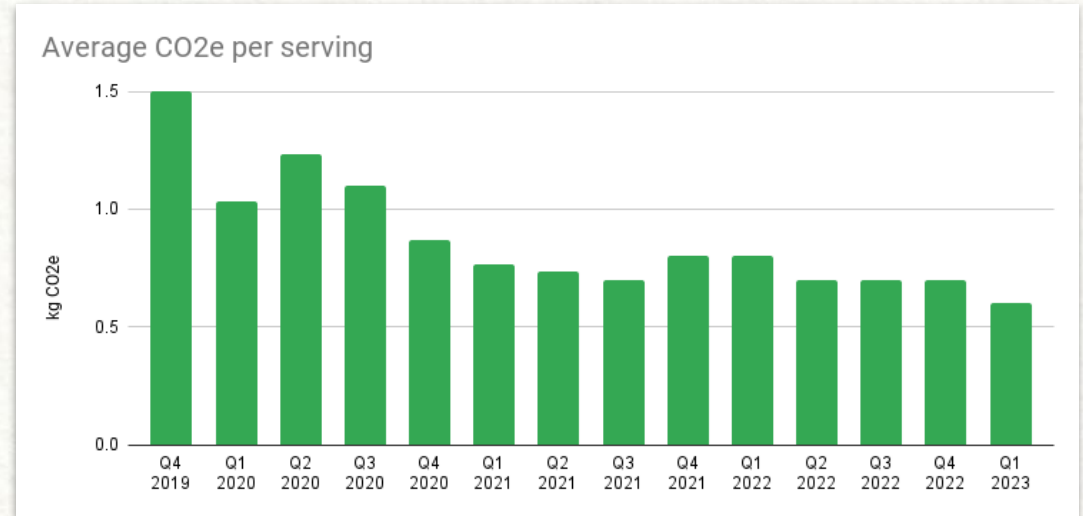

### TODAY'S LUNCH

<p><b>Veg Lindström</b> pickled beetroot cream, potatoes, green peas</p> <p style="text-align: center;"> <b>0.2</b> kg CO<sub>2</sub>e</p> <p><b>Italian meatballs</b> in tomato sauce gremolata with spiced spaghetti</p> <p style="text-align: center;"> <b>3.4</b> kg CO<sub>2</sub>e</p>	<p><b>Roasted parsnip &amp; carrots</b> rape seed oil</p> <p style="text-align: center;"> <b>0.1</b> kg CO<sub>2</sub>e</p> <p><b>Salted cod with blue mussels</b> white wine, boiled potatoes</p> <p style="text-align: center;"> <b>1.0</b> kg CO<sub>2</sub>e</p>
