Essential course information

1) **Course full name.**

Access to Base Registries eLearning course

2) **Course short name.**

ABR eLearning course

3) **Course Summary.**

Access to Base Registries (ABR) eLearning course will help you understand the aim of the ABR action, learn more about the BRegDACT-AP specification and why you should use it, as well as how to implement it. The course offers an overview of the main concepts supported with the practical examples which will help learner to better grasp the topic and become able to implement it in the daily life.

The course consists of two main parts: the course and the quiz.

The aim of this course is to present:

- [The aim of the ABR action.](#)
- [BRegDCAT-AP specification.](#)
- [Reusable tools](#) for BRegDCAT-AP implementation.

Target audience

This course is intended for intermediate users with some knowledge in the field. Target group are mainly data stewards and in particular people who describe data assets in the base registries, as well as other public servants who are dealing with this topic.

Learning objectives

User understands the advantage and need of implementing BRegDCAT-AP; knows where to find the specification and what tools and support is available to help them in the implementation process.
